

## **Bird Feeders for Pony Creek Nature Center**

### **Description**

The funds were used to purchase 5 seed feeders, one suet feeder, one hummingbird feeder, a heated bird bath and two hangers that attach to the deck rail at Pony Creek Nature Center.

### **Goals**

A generous local citizen built and donated a large bird feeding stand that was installed in front of Pony Creek Nature Center. The bird feeders purchased with this grant money are a wonderful addition to this unique structure. The two hangers that can be attached to the deck rail provide space for additional feeders to be spread out and creates more viewing locations.

### **Impact**

The feeders have done a wonderful job of attracting local birds up close and personal for Nature Center visitors and school field trip groups to enjoy.

We greatly appreciate all the opportunities the IOU provides Mills County Conservation and the public with the generous grants you offer.
