

## **Bird Viewing Blind at Pony Creek Park**

### **Description**

A permanent bird viewing blind at Pony Creek Park that will be accessible for students and the public.

### **Goals**

The goal of the a bird viewing blind at Pony Creek Park is to increase the public and school groups awareness of bird watching and conservation. The bird viewing blind construction was delayed due to unforeseen projects that arose. The Mills County Conservation Board has purchased the materials using the grant money to construct the bird blind and it will be constructed immediately once the ground has thawed.

### **Impact**

The blind will serve as a valuable tool for education year round as adults and children visit the park for bird watching programs.

We greatly appreciate the grant and apologize for the delay in construction. The blind construction is top priority for this Spring 2014.
